

# Bui Dinh Quoc

*Intern web developer*

**Date of Birth:** April 26, 2005, Vietnam

**Address:** Thu Duc, Ho Chi Minh

**Phone:** (+84) 353531263

**E-mail:** buidinhquoc2005@gmail.com

**GitHub:** <https://github.com/kittenwarrior-qb>

**LinkedIn:** <https://www.linkedin.com/in/quocbui05>

**Portfolio:** <https://www.quocbui.dev>

**Languages:** English - Vietnamese

## Education:

2023 – 2026: FPT PolyTechnic College Ho Chi Minh City - Information Technology.

## Activities:

2024 – 2025: FPT Hackathon 2025 – Algorithm competition.

2024 – 2025: Landingpage Hackathon, Figma Hackathon – School competitions

## Skills:

### **Front-end:**

- JavaScript, TypeScript, React.js, Next.js, Vue.js, Nuxt.js, Angular, Vite, PHP, Three.js, Webpack, HTML, CSS, SCSS, Tailwind CSS, Bootstrap5, Material UI, Ant Design, Shadcn, Microfrontend architecture.

### **Back-end:**

- Node.js, Express.js, NestJS, Microservices architecture, MongoDB, MySQL, PostgreSQL, REST API, Redis, ElasticSearch

### **Others:**

- Git, UX design, GitHub, GitLab, Docker, CI/CD, CircleCI, Firebase, AWS Bucket, Figma, Adobe Photoshop, Adobe Illustrator

## Work Experience:

05/2025 - 08/2025: Evolutee Startup - Freelance Backend Developer

08/2025 - 11/2025: Tuoi Tre Newspaper - Intern Web Developer

## Projects:

### **05/2025 – 08/2025: Social Media Automation Platform**

- **Company:** Evolutee
- **Responsibility:** Backend Developer

- **Description:** Developed a comprehensive backend system for a Social Media Automation Platform supporting Instagram and Threads. The system automates social interactions including follow, unfollow, post, reply comments, messages, and account management.
- Features include multi-device management and real-time dashboard with follower analytics. Built with scalable architecture supporting bulk operations across thousands of social accounts.
- **Tech Stack:** NestJS, TypeScript, Elasticsearch, Redis, MySQL, Docker
- **Duties:** Designed and maintained generic Filter System with multi-table, implemented Redis Cache for Statistics Overview, Built Elasticsearch Search Integration

### 08/2025 – 11/2025: Tuoi Tre Digital Library

- **Company:** Tuoi Tre Newspaper
- **Responsibility:** Intern Backend Developer
- **Description:** Tuoi Tre Digital Library is a content management and distribution system designed to store, manage, and serve digital newspaper archives.
- The project aims to synchronize data between the Digital Library website and the MyTuoiTre mobile application, allowing users to access articles, documents, and media content seamlessly across platforms through unified APIs.
- **Tech Stack:** Nuxt, TypeScript, Redux, RESTful API, MySQL
- **Duties:** Maintained and upgraded backend services to ensure compatibility with the MyTuoiTre mobile application. Fixed bugs, testing and report API response time

### 08/2025 – 12/2025: Wishzy - E-Learning Website (4 member)

- **Responsibility:** Frontend lead
- **Description:** Wishzy is a full-stack e-learning platform developed for the Graduation Project
- The system enables course, exam quiz management, video-based learning, payments, and user interaction, supporting multiple roles (Admin, Instructor, Student)
- **Tech Stack:** NextJS, NestJS, PostgreSQL, Bunny CDN, Zustand, Tanstack Query, Docker, Shadcn
- **Duties:** Created UI-UX, figma, data consistency, performance, development and UI architecture. Implemented and maintained CI/CD pipelines with GitHub Actions
- **Github:** [https://github.com/kittenwarrior-qb/renew\\_wishzy\\_fe](https://github.com/kittenwarrior-qb/renew_wishzy_fe)

### 01/2025 – 3/2025: Breadzy - E-Commerce Project

- **Description:** Built a complete e-commerce frontend using Angular 20 and Ant Design, featuring product browsing, cart, checkout, and admin management.
- Designed scalable UI architecture with reusable components, authentication using Angular Guards & Interceptors, Use RxJS for asynchronous data handling, state synchronization, and real-time UI updates.
- Containerized and deployed using Docker, with Caddy as a reverse proxy

- **Tech Stack:** Angular 20, TypeScript, Ant Design, Node.js, Express, MongoDB, Docker
- **Github:** <https://github.com/kittenwarrior-qb/breadzy>

### **08/2024 – 12/2024: Sportking - E-Commerce Website (5 member)**

- **Responsibility:** Frontend lead
- **Description:** SportKing is a full-featured e-commerce website for sports equipment developed as a school project, built with a Pure PHP MVC architecture.
- The system supports product management, shopping cart, order processing, content management, and ZaloPay payment integration, with role-based access for Admin and User.
- **Tech Stack:** PHP, MySQL, Bootstrap5, Javascript, MVC
- **Duties:** UI-UX designed, development
- **Github:** <https://github.com/kittenwarrior-qb/sportking>

### **05/2024 – 8/2024: Webtoon - Comic Reading Project**

- **Description:** A full-stack comic reading application developed as a school project, inspired by platforms such as docln.net and Wattpad.
- The system supports role-based access (Admin, Author, Reader), story and chapter management, personalized reading experience with auto-saved progress, and social interactions including comments, reviews, and ratings.
- Containerized and deployed using Docker, with Caddy as a reverse proxy
- **Tech Stack:** ReactJS, NodeJS, MySQL, Docker
- **Github:** <https://github.com/kittenwarrior-qb/WebToon>
